

FANTASY AIR

Standard equipment

Flying instruments

Airspeed indicator, Altimeter, V.S.I., slip indicator and Compass
Dynon EFIS Glass Cockpit Display with engine monitoring available at extra cost - saves ≈ 2.0kg
Flying Instruments not included with kit to enable fitment of own choice – See options list

Engine instruments

RPM tachometer, coolant temperature, oil temperature, oil pressure, fuel level and fuel pressure gauges. (Only Tachometer, CHT and Oil temperature/pressure and fuel content instruments supplied as standard with the kit – See options list)

- Fuel system is fitted with auxiliary electric pump, bypass valve, anti-vapour lock device and a gascolator/filter
- Hydraulic disc brakes on main wheels with self adjusting parking brake
- Adjustable height and reach seats
- Wheel spats
- Composite wing tips (can be supplied with clear lens for strobes and landing lights if required)
- Electric flap control with electronic flap position indicator
- Electric trim with push button control on top of the joystick and LED indicator on panel
- Upholstery of a cockpit and seats (Leather seats available as an option)
- Certified carbon fibre composite high performance propeller (Specially designed for Rotax 912)
- Colour design - white + 2 colour vinyl shapes – choice of several designs

Options

Ref No	Option
5100	Flight instrument set (Airspeed, VSI, Altimeter, Compass, Slip ball)*
5102	Engine Hour Meter
5103	Fuel Pressure Gauge*†
5104	Dual CHT Instrument
5105	Single EGT Instrument
5106	Thermometer Combined Exhaust - Head
5110	Dual EGT Instrument
5111	Voltmeter
5112	Ammeter
5113	Voltmeter + Ammeter - combined
5114	Stall Speed Indicator
5115	Electrical Board - Panel Clock
5116	TL-Elektronics EMS (Engine Monitoring System)
5201	Strobe Beacon on top of tail
5202	Halogen Landing Light on lower engine cowl
5206	Panel mount radio - Icom A-200, Filser, Micro-Air or X-COM
5207	Aerial Type IC-292-1
5211	Navigation Lights in Wingtips + wingtip board, 2 pcs
5212	Strobe Beacons on Wingtips - 2 pcs
5213	Halogen Landing Lights in Wingtips - 2 pcs
5214	Electrical Fuel Pump with Valve * †
5215	Electrical outside Starter Socket with Cable

5216	Main Battery Isolator
5217	Electric switch + breakers (5A or 10A) *
5315	Window Ventilation in Door, 2 pcs
5316	Window for Air - Photography
5320	Cabin Heater
5323	Tank Drain Valve
5324	Wheel Spats - 3 pcs * †
5341	Additional fuel wing tanks (VLA only)
5343	Leather interior
5344	Coloured instrument panel
5345	All metal wings (VLA version only)
5346	Opening flap on the cowling for oil check
5349	Float attachment
5409	Tow bar for moving aircraft in Hangar
5412	Cover Sheets - Cabin
5413	Metal Funnel
5415	Control Stick “Y” Extension for Training
5416	Windscreen Foil against the sun

* Standard on RTF

† Standard on kit

Note some of the “extras” are standard for the UK specification – see * † note above. Also not all options are possible on the microlight version due to different empty weight limits in the UK.

We highly recommend the use of the Flight Box EFIS and Engine Management system due to the great functionality and weight saving, which will allow other options to be fitted especially on the microlight version (This is currently under review and the Flight Box may become standard equipment)

Dynon unit shown above - Flight Box has analogue type dials
